

Nestled in the heart of Southern Texas, Riverside Golf Course is a Public 18 hole golf facility that brings some of the best golf to the region. The original 18 hole course, comprised of the Red and White nine hole layouts, was designed in 1945 by Ralph Plummer and opened in 1953. Riverside Golf Course was expanded to 27 holes when the Blue course was added in 1990's. The course now plays as the original Par 72, 18 hole arrangement, at 6,579 yards. Placement of tee shots is critical with several tree-lined fairways, water hazards, and strategically placed trees that have grown to the size of original design. With four groups of tees available, there is a set up and yardage combination for all levels of ability. Golfers frequently see deer and other wildlife roaming the course, creating an atmosphere that can only be found in the park.
